

Xenia

A profile characterized by **high installation versatility and brightness**, specifically designed for indoor spaces. Lines of light can be created **even in areas that are more difficult to access** thanks to the different kinds of brackets proposed as accessories.

Passive heat dissipation

Anodised aluminium extruded casing

Light distribution

Five optics available for several light effects, including the possibility to aim light (in the bracket-mounted version)

Anti-glaring

The anti-glare accessory drastically cuts down LED frontal glare. Ideal with asymmetric and 20° optics for wall lighting.

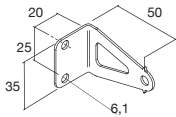

The accessory must be ordered with the corresponding bar and mounted by our firm.

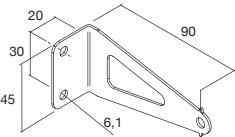

Figures showing bar with or without anti-glare accessory (fig. B and fig. A respectively).
Note that eliminating frontal glare does not reduce light emission.

Fixing brackets

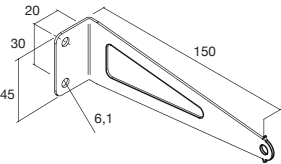

Brackets for fixing and rotating Xenia in-line spotlights.
AISI 304 Polished.
