

Motion's light thousand games.

The ring, designed by Oriano Favaretto, moves in space, sinuous and precise. The suspended tilting structure makes the lamp dynamic and functional. Through the PMMA silkscreened diffuser, the aluminum ring holding the LED source spreads a smooth and wrapping light. Light Game is also provided in ceiling version, in two options: big, providing a rotation and vertical axis tilting; small, able to move from the center, providing a complete rotation

.Light Game

.A light illuminating familiar
environment,
a bright disk that follows
my notes.
