BOLLARDS

BOND PRO 2025

BOLLARDS

BOND PRO

Ergonomic design

The light source in the top of the bollard is screened by the circular flange to create a total cutoff, so that the light is never invasive and fits perfectly with its environment.

The light emitted illuminates the portion of the area below. The Bond PRO range offers three different sizes that allow the product to be declined in a variety of application contexts.

i-LÈD

Polyester powder-coated aluminium body and
protective surface treatment or stainless steel body.
Opalescent white polyethylene diffuser.
